Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 61, 64, 67, 70 are rejected under 35 U.S.C. 102(e) as being anticipated by Tewfik et al (US 6,571,337).

As to claim 61, Tewifik et al disclose a method for reading digital watermark digital data contents in which each bit of digital watermark data is embedded a plurality of times (a digital watermark detector), said method comprising the steps of receiving digital data contents (column 11, lines 3-5); reading a digital watermark sequence from said digital data contents (column 3, line 64-column 4, line 22); performing soft decision in code theory by assigning weights to said digital watermark sequence with a weighting function (column 1, lines 41-51); and reconstituting and generating digital watermark data from said digital watermark sequence (column 1, lines 41-51).

Allowable Subject Matter

5. Claims 62, 63, 65, 66, 68, 69, 71, 72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
